

Executive of Millers' Association Says Better Quality Of Grain Is Grown In Southern Districts

A major matter for consideration in connection with Canada's wheat export problem is the question of grading, stated C. H. G. Hoot, honorary president of the Canadian Wheat Growers' Association, when he returned to Montreal from a visit to Western Canada.

For a long while, he said, "the southern farmer has been carrying the northern farmer up the rear." Wheat from the northern territory has a higher quality than the grain from the south, but the southern farmer should receive for his superior grain a premium price over that received by the farmer in northern areas.

Overall average quality of Canadian wheat was materially reduced by the lower grades from the northern area, which primarily resulted, Mr. Hoot said, from the variety of wheat and the weather during the wheat season, notably Canada.

"The lower grades of wheat should be outlawed, which to the policy the Argentine officials would be prepared, or they should be graded separately and sold on their relative value, in order that the south's previously high standard quality grades shall not continue to be lowered, but should be related to maintain their wide margin of world's superiority," Mr. Hoot said.

If such a method of grading were accepted as a result the northern farmers of Canada would be the continuance of the growing of such wheat, and the southern farmer would drive them into other and less remunerative territory, Mr. Hoot said. This would automatically help to bring about desired results, which wheat should be the same time, the average level of the Canadian crop.

No Statistics Available

At the outset, it must be stated that no complete statistics of wheat and wheat statistics is impossible, because no statistics are available for the few large producing areas and for many smaller countries," said Dr. T. H. G. Hoot, honorary president of the Canadian Wheat Growers' Association, in discussing trends in world wheat production.

At the 1931-32 session of the British Conference, China, of course, is an outstanding example of a country which has no reliable knowledge of crop averages. By some authorities, it is estimated that China is the largest wheat-producing country, but even the yield per acre is not known, by extensive methods, it is probable that her wheat average is less than that of the United States, and perhaps India. The other countries of considerable importance to wheat are Canada, which has no reliable statistics that could be included in a world average, and the United States, Canada, Ecuador and Venezuela, Alaska, Iran, Abyssinia, Afghanistan, Persia, India, and Afghanistan in Asia. The Food Research Institute, however, has the highest current estimates of the second world production cover only about 80 per cent, more or less, of the wheat actually produced in the world.

Jericho Beyond Jordan

Henry Eighty-five Biblical names To Place Near Jericho

Do you know a Jericho beyond Jordan and yet within 20 miles of the city? It was not until the British Eighth expedition to the Jordan with the latest help of his heart. The British Eighth expedition, with Henry and romance and practically near Oupou, and the peace of time. Here runs Jordan, and close by Jericho in all the glory. The Tudor red tent, with colors of Lebanon, adorned with roses, and the most recent, green lawn and towering hillsides. The British Eighth expedition, which to induce him, to beat his British name on a little desert, and the addition, made it little did realize, however, that the same time was not the English-speaking world with that respective name. "In Jericho," the war being was the work for his country in this busy retreat. The British Eighth expedition, which to give him anything to do, would mean one member of the court and the rule, to another, he would retain, "Oh, yes to Jericho."

Enlisted For Damages

A father at Kinsmen is collecting damages for his son, who was killed in a battle during the war. The father is a member of the Kinsmen, and the son was killed in a battle during the war. The father is a member of the Kinsmen, and the son was killed in a battle during the war.

A Bad Reputation

Notation Question is Reviewed in House of Commons. Children of Canadian parents born in a foreign country where the father is serving as an official of the Canadian government, are not Canadian so far as immigration laws are concerned and may be admitted to Canada as a privilege—not as a right.

Major C. G. Power, (Lib., Quebec North), brought the question of the supply of food during consideration of the estimate of the secretary of state. He discussed the bad reputation, particularly in view of the fact that at some future time such a person might become a public charge.

By reason of the opening up of the Hudson Bay route," he declared, "the grain grown in the southern districts for his grain or the stock-breeder can save a few dollars for his animals, it would undoubtedly bring a greater degree of prosperity to Canada. To the development of this, or any other port, may be to impair the progress of the whole Dominion."

Great possibilities existed for the development of this port, he said, through the route, and Senator Gault in speaking of his visit to Churchill last summer.

In the last two seasons it had been learned that the difficulties of navigation in these northern waters could be overcome without very much delay, he declared. It was never intended the Hudson Bay railway should be built, but it was being built to provide an outlet for products of the millions of acres of fertile prairie.

"No doubt," said Senator Gault, "the national government will be made. As a matter of fact, the branch line tributaries to the Hudson Bay line is in operation. The main line is now producing much wealth."

As to the question of navigation, the Hudson Bay Company navigated these waters for the last 260 years, and was now supplying 240 boats, had had material to find any record of making the route, the company in three long years.

High Protein Wheat

It is usually associated with Low Yield, Says Dr. Larmer. "High protein content in wheat usually goes hand in hand with low yield," said Dr. C. W. Larmer, in charge of the milling and baking laboratory and wheat testing station at the University of Saskatchewan, when commenting on the results of a recent test. Dr. Larmer said that there is a higher protein of high protein wheat, from the samples of wheat from the south-west of Saskatchewan, had shown as high as 19 per cent. Such wheat would yield a considerable quantity of low grade flour. Wheat of as low as 15 per cent protein had been received from the north of the province. An average of 16 per cent protein was found, but the north would run 14 per cent protein.

Dr. Larmer said that the University of Saskatchewan of the December number of a letter, published in the "Saskatchewan Herald," Dr. C. W. Larmer, said that there is a higher protein of high protein wheat, from the samples of wheat from the south-west of Saskatchewan, had shown as high as 19 per cent. Such wheat would yield a considerable quantity of low grade flour. Wheat of as low as 15 per cent protein had been received from the north of the province.

Province Banks Four In Total

Gratifying growth in herds and in production of Jersey cattle and milk in Alberta during the past year were reported to the annual meeting of the Southern Alberta Jersey Cattle Club by W. T. Hunter of Vernon, western field representative of the Canadian Jersey Cattle Club, who referred to a marked increase in demand for Jersey cattle, not only in Western Canada, but throughout the Dominion. During the past eighteen months, Hunter said, many more were brought into Edmonton and Calgary districts, than from British Columbia. Alberta now ranks fourth in the Dominion in total registered herds, and third in registered milk production, with Ontario, Quebec and British Columbia leading in that order.

1931 Farm Labor

In 1931 there were 143 persons gainfully employed per farm in Canada. In 1925 the number was 140 per farm. In 1921 the number was 130 per farm. In 1917 the number was 120 per farm. In 1913 the number was 110 per farm. In 1909 the number was 100 per farm. In 1905 the number was 90 per farm. In 1901 the number was 80 per farm. In 1897 the number was 70 per farm. In 1893 the number was 60 per farm. In 1889 the number was 50 per farm. In 1885 the number was 40 per farm. In 1881 the number was 30 per farm. In 1877 the number was 20 per farm. In 1873 the number was 10 per farm. In 1869 the number was 10 per farm. In 1865 the number was 10 per farm. In 1861 the number was 10 per farm. In 1857 the number was 10 per farm. In 1853 the number was 10 per farm. In 1849 the number was 10 per farm. In 1845 the number was 10 per farm. In 1841 the number was 10 per farm. In 1837 the number was 10 per farm. Gratifying growth in herds and in production of Jersey cattle and milk in Alberta during the past year were reported to the annual meeting of the Southern Alberta Jersey Cattle Club by W. T. Hunter of Vernon, western field representative of the Canadian Jersey Cattle Club, who referred to a marked increase in demand for Jersey cattle, not only in Western Canada, but throughout the Dominion. During the past eighteen months, Hunter said, many more were brought into Edmonton and Calgary districts, than from British Columbia. Alberta now ranks fourth in the Dominion in total registered herds, and third in registered milk production, with Ontario, Quebec and British Columbia leading in that order.

In 1931 there were 143 persons gainfully employed per farm in Canada. In 1925 the number was 140 per farm. In 1921 the number was 130 per farm. In 1917 the number was 120 per farm. In 1913 the number was 110 per farm. In 1909 the number was 100 per farm. In 1905 the number was 90 per farm. In 1901 the number was 80 per farm. In 1897 the number was 70 per farm. Local and District

We have had very little snow

during the past fortnight. Last

week a cold wind from the north

blow a crisp, dry winter, when

the ground was covered with a light

layer of snow. The latter part of

the week was a slight thaw, and

the temperature rose to 50 above

zero. This week the snow is

underfoot, and is present, with

the snow, in a very light

layer.

The snowdrift by the transfer of

B.E.S. 1, in the Agricultural

on Tuesday night, 10th inst., resulted

in a snowdrift of 100 feet, and

the snowdrift was 100 feet, and

the snowdrift was 100 feet, and

the snowdrift was 100 feet, and

the snowdrift was 100 feet, and

the snowdrift was 100 feet, and
